## Igor Avsec

has attended the High Pressure Technology Symposium  
on 22<sup>nd</sup> + 23<sup>rd</sup> March 2017:

### Specialist papers:

- Washing, deburring and surface roughening of engine parts
- Latest status in the concrete rehabilitation technology
- Automation in pipe and heat exchanger cleaning
- New products for corrosion protection

### Demonstrations:

- Deburring and roughening of automotive parts
- Reaction force free operation with blasting guns
- New tank cleaning unit with increased performance
- Unit with electrically operated intermediate gearbox
- The new ES 3 controls
- Dynamic high-frequency component testing
- Cutting with ultra high pressure water
- Heat exchanger cleaning
- Hot water applications
- Automated preparation of metal surfaces
- Selective removal of concrete
- Coating systems
- Hammelmann APP „Water jetting calculator“
